Good morning my favorite Weston folks!☺. Megan would be on that list too, but Marty banned me from texting her. Good morning to you to, Don Goodrich, EPA R8 analytical services coordinator. Preferably this morning I would like to discuss Gold King Mine analytical per sample costs & the status of data validation as a process. Ideally Don can participate in the call. Moira, can you propose a time?

We also need to discuss briefly (really) today's anticipated sample numbers & requested analyses.

Thank you for your dedication to this spill response & your good cheer despite the slings & arrows of outrageous fortune.
